

Solutions for refrigeration and retail units and systems  
solutions for compressor racks and remote control services

tService  
Rack

## Technology under control

### Reduce maintenance costs

Through remote analysis of system operation, you can retrieve all the information you need at a simple click: you can solve minor configuration problems directly from your office, wherever you are. For more serious problems, fast data analysis gives you all the information you need before taking action and lets you know what components you have to take with you to restore correct system operation.

### Improve service levels

Keep all your systems monitored, plan maintenance and analyse unit operation regardless of the supervisory system installed.

Connectivity to your system is simple and immediate; you can freely choose which communication channel to use, either Wireless GSM or an Ethernet line, with secure and reliable solutions. You can access all system information from any device: from your PC in the office, or smartphone or tablet wherever you're working offsite.

Give your services new energy: expand your offering with new value-added proposals for remote system control, independently of existing supervisory systems.

## Make system innovation more secure

control your new technological solutions and optimise unit operation. Use advanced graphs to compare all the main system parameters. Check site operation before

and after updating the configuration: in this way, you can easily highlight the advantages of the new settings. Use the default layout or create a map of the installation to make analysis more intuitive. You can offer a custom layout with all the main information on site

operation. Customers are thus assured that expert personnel are keeping their units under control and will be satisfied with the service offered.

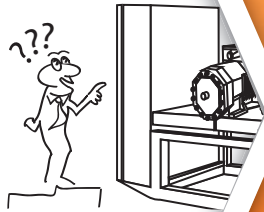

access your units

change the settings via remote

analyse unit performance

**1** activate a new subscription to update your account and receive a box for connecting to your new system

- RTSRTW000 Wireless subscription
- RTSRTH000 Ethernet subscription

**2** install and configure your system so that everything you need for analysis is available

the system is now always available, the site has been connected to your list of installations managed....  
**GOOD JOB!**

### plug&play

Wherever your system,  
Wherever you are...  
...you can have your system in your pocket in just a few steps

### Scalable solution

10, 100, 1000 systems  
10, 100, 1000 users...  
...the information you need will always be available

### Independent solution

Preconfigured access to your units.
