CAREL

connectivity, monitoring & remote management systems
remote management and communication solutions

remotepro
improve your range of services with
CAREL centralised supervision

carel.com

Reduce management costs and optimise your time

The information you need has never been so easy to retrieve as with the CAREL centralised supervision system

- intuitive and easy-to-use web interface;
- controlled and secure access to stores;
- simplified and fast management of all sites
- continuous system optimisation over a remote connection

CAREL aims to offer an increasingly complete and efficient supervision solution. From controllers in the field to the centralised system, every point has the same basic objectives: control, management and optimisation. And remotepro fits right at the tip of this control pyramid.
Whatever the application, remotepro is the solution that allows the situation on systems located in different places to be checked with just one click.

Maintenance
Product safety and quality are always guaranteed. Reduced management times and costs.

Data analysis
Not just simple data, but rather information that allows the right decisions to be made.

Energy saving
Optimisation close at hand, thanks to interactive graphs and scheduled reports.

remotepro:
the turnkey solution

Manage and control your systems in the simplest possible way.
Get as much information as possible out of your data.

A powerful and effective ally for maintenance managers who want to keep the situation under control at all times. Any malfunctions are promptly signalled, and can be managed over a remote connection without physically needing to go on site:
- notifications via email;
- documents and notes relating to the system can be shared;
- different system access profiles;
- continuous control of correct system operation via life test;
- centralised management of units by corresponding local supervisors.

Supervisor overview

Alarm management

Alarm behaviour statistics

Real time analysis of system alarms.
Optimised planning of service call-outs to minimise travel.

System optimisation, energy saving and product quality are the main objectives of data centralisation:
- data copied from local to centralised system;
- interactive graphs to make system troubleshooting faster;
- different system access profiles;
- custom reports and compliance with legislative requirements in force;
- statistics on cabinet temperature behaviour.

Part numbers
- RVSTDRM000:
  - Remote maintenance.
  - Up to 50 sites.
  - Alarm management and statistics
- RVSTDM000:
  - Up to 50 sites, with a maximum of 7,000 variables.
  - Data management and statistics

an increasingly service-oriented solution

Access made-to-measure supervision services

To respond to different customer needs, CAREL provides a team of experts to support and analyse the various opportunities the market proposes, so as to create new, value-added services.

Divide your sites by geographical region. Provide access to different maintenance companies or customers simply and securely, using the same system. A single solution to boost your business.

Services provided

- HW consulting for sizing and tuning the system;
- consulting for IT infrastructure setup;
- system start-up and commissioning;
- training in the field or in the classroom for complete system management;
- definition and implementation of custom specifications.

Geolocation

Service quality

Call Centers and management of large amounts of data are just some of the many opportunities the market is currently making available. RemotePRO offers a range of made-to-measure solutions to simplify and make these developments possible.
