

connectivity, monitoring and remote management systems

remote management and communication solutions

remotepro - NRGdash

simple and fast monitoring and analysis
of energy consumption for all systems

Energy saving is becoming an increasingly important and even critical aspect for our customers.

The ability to quickly check trends in total energy consumption, analysing the variables that affect system performance, is a need shared by everyone operating in HVAC/R. Comparative analysis between systems with similar operating features and structures is essential in being able to quickly identify energy expense factors and adopt suitable countermeasures and potential investments.

Reducing energy consumption means reducing running and operating costs, thus adding extra value to the solutions supplied.

Value that translates into competitive

advantage on the market and signifies care for the environment.

CAREL offers Energy Saving solutions that exploit control logic developed throughout its extensive experience in the refrigeration and air-conditioning businesses.

The focus is increasingly shifting from control of individual systems to all sites managed. This is where CAREL, through its new remotepro – NRGdash solution, can provide a response to all these needs, representing a partner not only as regards technology but also value-added solutions, allowing customers/partners to in turn develop solutions and proposals that generate new business.

Simplified analysis and rapid identification of energy expense for System Managers and/or Energy Managers.

remotepro – NRGdash

The technologically most advanced system for acquiring data from all systems installed, using the information acquired to create new business opportunities.

Benchmark

Benchmarking between systems based on type and features.

Analysis

Periodical analysis of different systems with detailed distribution of energy consumption and identification of the variables that affect energy expense.

Comparison

Time-based comparison of individual systems over weekly/monthly/yearly intervals.

P/N	Description
RVSTDND000	NRGdash, centralised energy dashboard (additional plug-in for P/N RVSTDDM000)

Effective
Feedback for improving systems

User-friendly
Data is easy to read and understand

Integrated
Support for all Carel supervisors
